STRONG CONNECT Modular Linear Lighting System

The NORDEON SC System is a unique integration of both accent and ambient lighting into a single solution. The wide range of optical solutions and the flexibility in positioning makes Strong Connect the ideal solution for commercial and retail applications.

- Transform your space into an experience
- Combination of both accent and ambient lighting in one design with clean aesthetic transition between the linear and spot modules: drivers for spots are 'hidden' inside the trunk.
- Easily modify configuration of the module when store layout changes:
 - Full flexibility to place general lighting units, spots, lighting controls, emergency lighting units and blind covers at any position (2-foot grid)
 - The versatile trunking enables changes without the need of tools and technical know-how.

WIDE VARIETY OF OPTICS, PERFECTLY SUITABLE FOR ALL RETAIL ENVIRONMENTS

- | | | | |
|--|---|--|---|
| | DA20 Double asymmetrical for aisle lighting (2 x 24°) | | NB Narrow beam for high halls and high rack areas (32°) |
| | WW Asymmetrical wall washer (25°) | | MB Medium beam for general light in open areas (74°) |
| | DF2 Opaque diffused direct/indirect for areas with uplight (116°) | | WB Wide beam for low installation height (88°) |

*Contact factory for Narrow, Medium, and wide beam distributions
